(54) Title: METHOD AND DEVICE FOR MESSAGE DELIVERY

(57) Abstract: Electronic device (1) and methods for displaying a received electronic message at the electronic device. The electronic message comprises a geographical display condition. If the geographical location of the electronic device (1) does not fulfill the geographical display condition, the message will not be displayed. The message may be a message or a notification message thereof sent from a first to a second communication device. The geographical position may be determined internally of the device addressed in the message, or externally by a service node of a communication network forwarding the message.
